Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

The examiner is in receipt of applicant's reply to office action mailed 8/23/2006, which was received 11/28/2006. Acknowledgement is made to the amendment to claims 31. The applicant's amendment and remarks have been carefully considered, but were not found to be persuasive, therefore the previous rejection modified as necessitated by amendment follows:

Examiner's Note

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 31 and 35-45 rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson et al (US PG Pub 2004/0039750) in view of Official Notice.

In regards to claims 31 and 35-37, Anderson discloses all the features of the instant claims. For instance, Anderson teaches "the present invention relates to a computer publication and provides a computer publication in the form of a virtual book, magazine or catalogue. The publication appears on the computer screen with the "look and feel" of a real-life publication. The publication has pages which can be turned (appearing as an animation on the computer screen) and the publication can be manipulated with the appearance of being manipulated in three dimensions" (see abstract and all FIGURES). Anderson further teaches links to purchase products (para 106) and the use of a pull down menu to easily navigate to desired products (para 26).

Anderson teaches navigating to items on a specific page by clicking on an iconic subject (FIG 15), but does not specifically mention that the content that the user is directed to is a link to shopping related content. McCurdy teaches embedding links and advertisements into the content of an ezine for interactive shopping while reading the ezine (para 0014, 0223). It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in Anderson identifying advertisements in the index to direct the user to that location, because statistics show that most magazine publishers' primary source of revenue is advertising (para 0323), therefore, advertisers could index their adds and direct customers directly to them as in a catalog model.

Applicant may argue that neither Anderson nor McCurdy teach an index of advertisements. Global Finance teaches an advertisers index for locating advertiser's adds in a magazine. It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in the combination of Anderson and McCurdy the use of an index of advertisers, because this was an old and well-known means to provide easy location of adds in a magazine that readers might find interesting.

Response to Arguments

Applicant's arguments with respect to claim 31 and 35-37 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
